My name is Onke Nyathela, I am currently based in Johannesburg and willing to relocate. I am 26 years old, born and bred in Dutywa, in the Eastern Cape.

I went to the University Currently known as Rhodes University and studied Computer Sciences. Upon my arrival at Rhodes, I had no understanding, nor knowledge of programming. However, the first time I started coding, it was love at first sight and I knew that I did not want to be an Astrophysicist anymore, but a Software Developer.

It is for this reason that even when I couldn't finish my degree due to financial difficulties, I continued writing code and learning new things on my own, using resources from the internet.

I have taught myself the basics of Java, JavaScript, and C++. In addition to the C#, C, and F# languages that I learned during my time at university. I am currently learning front-end development.

My current portfolio only consists of the front-end of a website and I am hoping for the opportunity to further my front-end skills and practice my back-end skills through this learnership opportunity.

## EXPERIENCE

JUNE, 2018 – JULY 2019

### COMPUTER SCIENCE TUTOR, RHODES UNIVERSITY

- Boosted students' understanding of Computer Sciences by reviewing classwork, homework, and practical tasks
- Utilized benchmark assessments to evaluate student progress and tutoring success.
